Early Adopter Partners- bringing specific expertise

Delivering a seamless experience from digital twin to digital enterprise

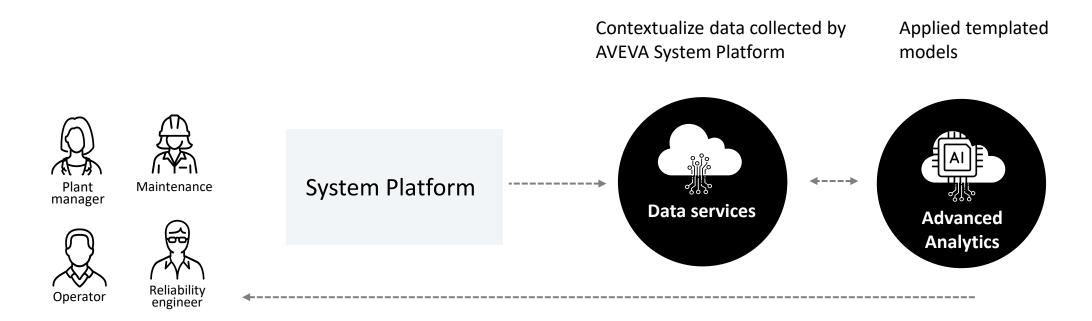

Reduces environmental impact and increases supply of treated water

- Acciona Agua is a world leading EPC in the construction of desalination plants
- Acciona has collaborated with Schneider Electric for many years in support of their Digital Transformation journey
- AVEVA was introduced to support:
 - Increased water production capacity and reduction of energy use
 - Improve the performance of all water treatment facilities with minimum impact to the environment
 - Provide a digital solution that could anticipate equipment behavior deviations and find the optimum operating point in real-time

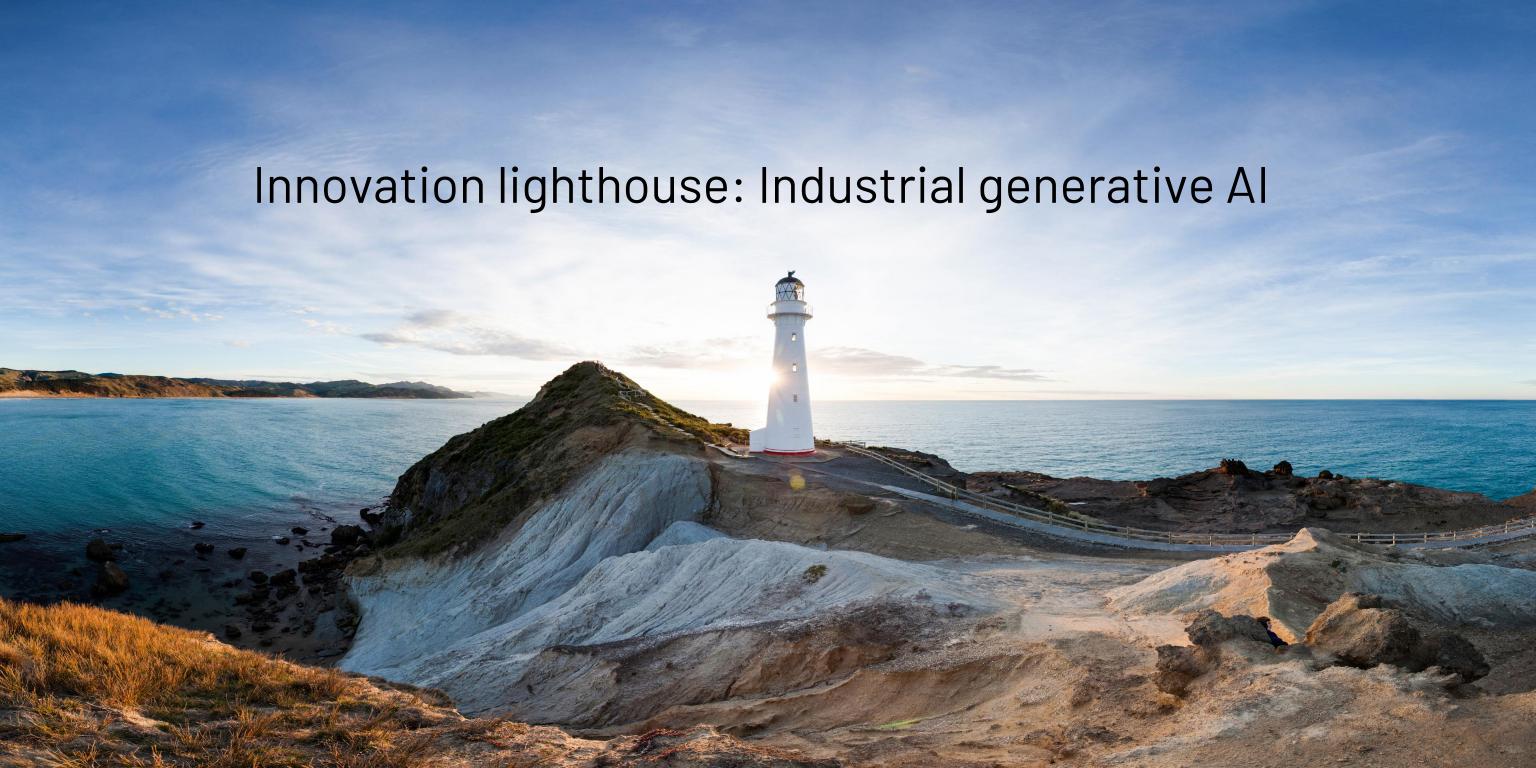

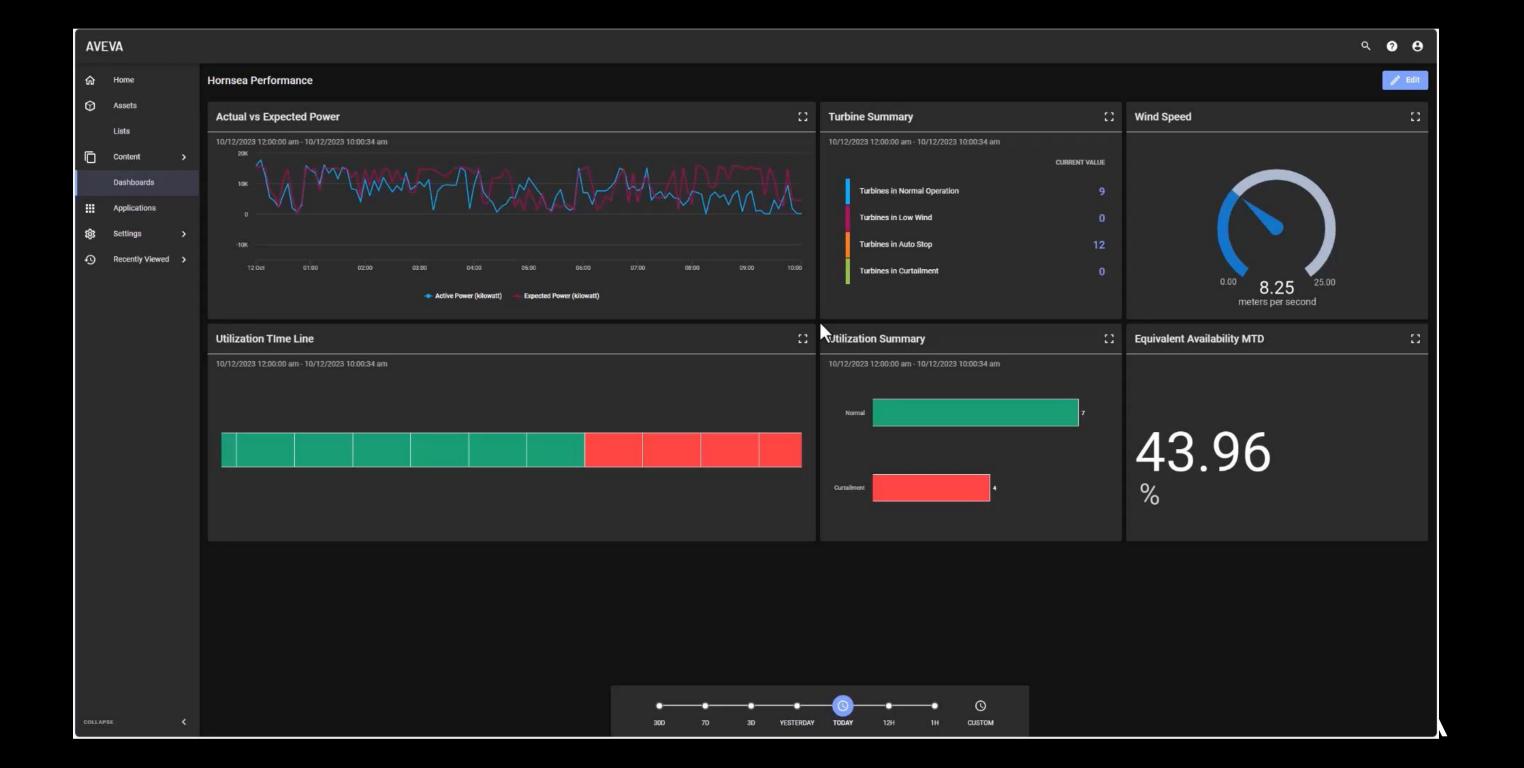

Aggregate and contextualize industrial data to create incremental customer value

- Prediction model enabled optimization of energy recovery systems resulting in 4.6% reduction in energy consumption of the high-pressure pumps, and increased production capacity of this section of the reverse osmosis system by 16 m3/hour
- Increased efficiency in O&M teams thanks to readily available information
- Improved confidence from clients due to transparency of operations

Build connections, spark your ingenuity
