

MAY 2024

From HMI/SCADA to Operations Control

STRATEGIC VISION

Doug Warren- SVP, HMI/SCADA Business

AVEVA

Trends Influencing Industrial Operations

Challenging Traditional Approaches

Customer Trends

- Organizational Convergence
- Software Sprawl
- Resource Challenges
- Informational Silos Breakdown
- Globalization/Consolidation
- Digital Transformation/Data Priority

Technology Trends

- Cloud Computing
- Containers
- Managed Services
- Artificial Intelligence
- Generative AI/LLM
- Unified Namespaces
- MQTT Brokers
- Data Ops
- IIoT

Market Trends

- Inflation
- Margin Pressure
- Distributed Workforce
- Geo-Political Uncertainties
- Digital Natives Become the Majority
- Cyber Security

Key Strategic Initiatives to Improve Customer Success

Moving AVEVA from HMI/SCADA to Operations Control

Extend Use Cases	Consolidate the activities that the operations teams must execute to perform daily activities
Expand Access	Facilitate the access to data and the applications to empower a remote and mobile workforce.
Expand Models	The contextualization and normalization of data must be performed at the edge where the daily industrial operations are performed
Improve Lifecycle Management	Drive down the cost of building and maintaining the systems used to manage industrial operations from edge to enterprise.
Align Commercial Model	Remove barriers introduced by traditional commercial models that impair customers from executing to their optimal capabilities.

CONFIDENTIAL

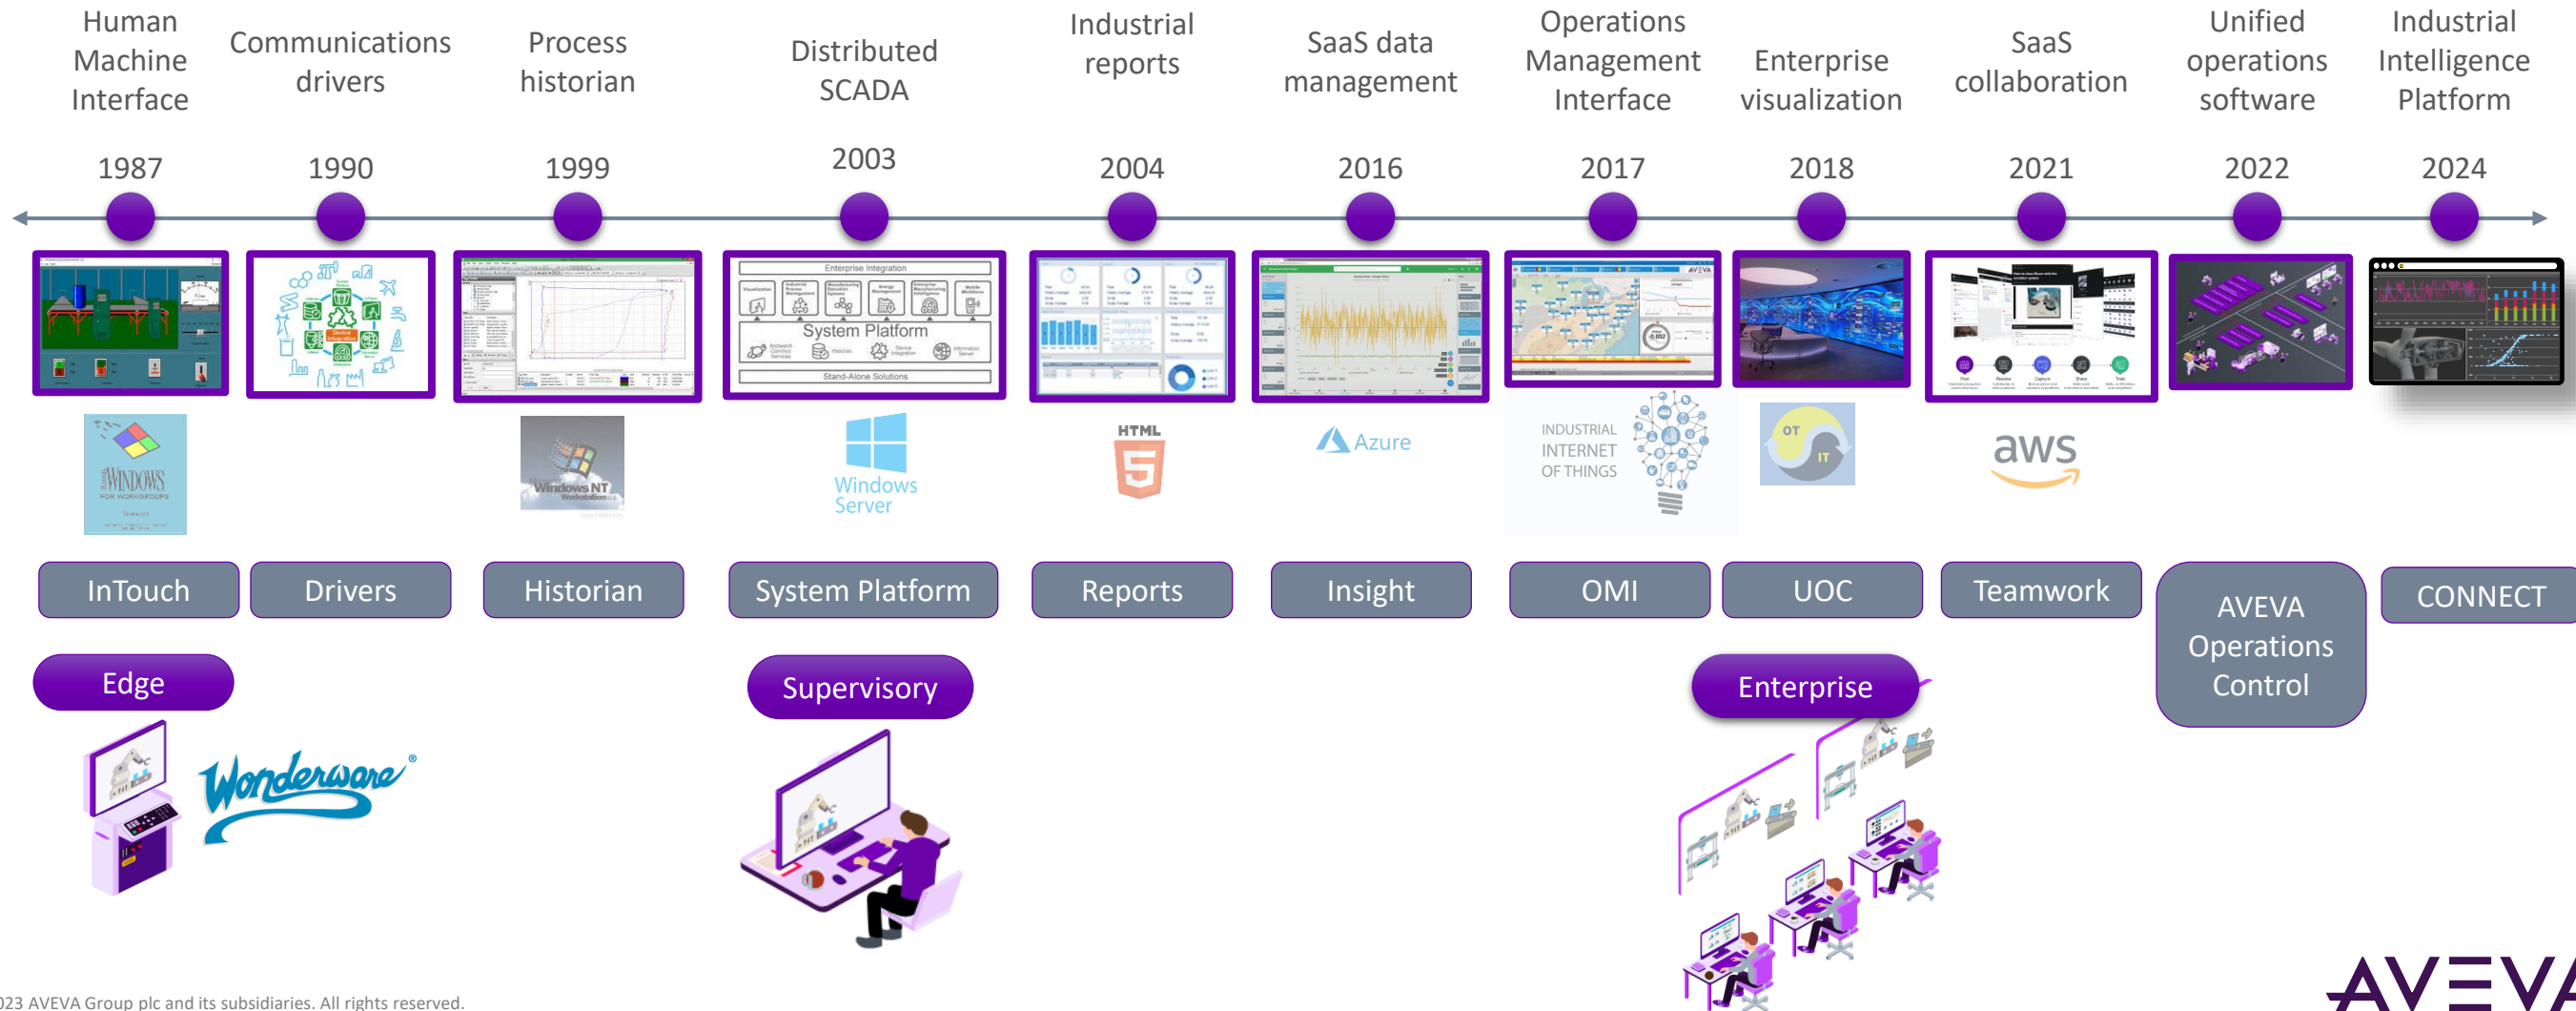

Extend Use Cases

Consolidate the activities that the operations teams must execute to perform daily activities

AVEVA

Technical evolution to AVEVA Operations Control

Proven history of market leading innovation

Operations – A Day in the Life

Enabled By AVEVA Operations Control – Hybrid Cloud Operations Platform

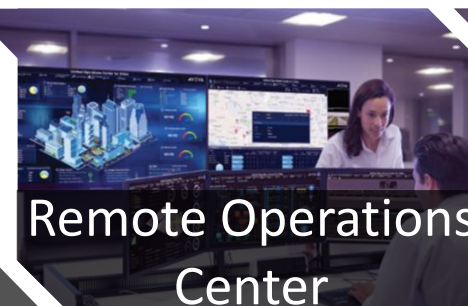

Edge to Enterprise...

Building on a legacy of HMI/SCADA...

Enterprise Edition

Long Term Focus
(up to 1 Year)
Enterprise View
IT/OT Convergence

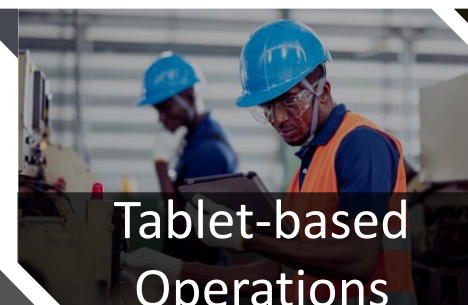

Supervisory Edition

Medium Term Focus
(up to 1 Week)
Process View
OT Convergence

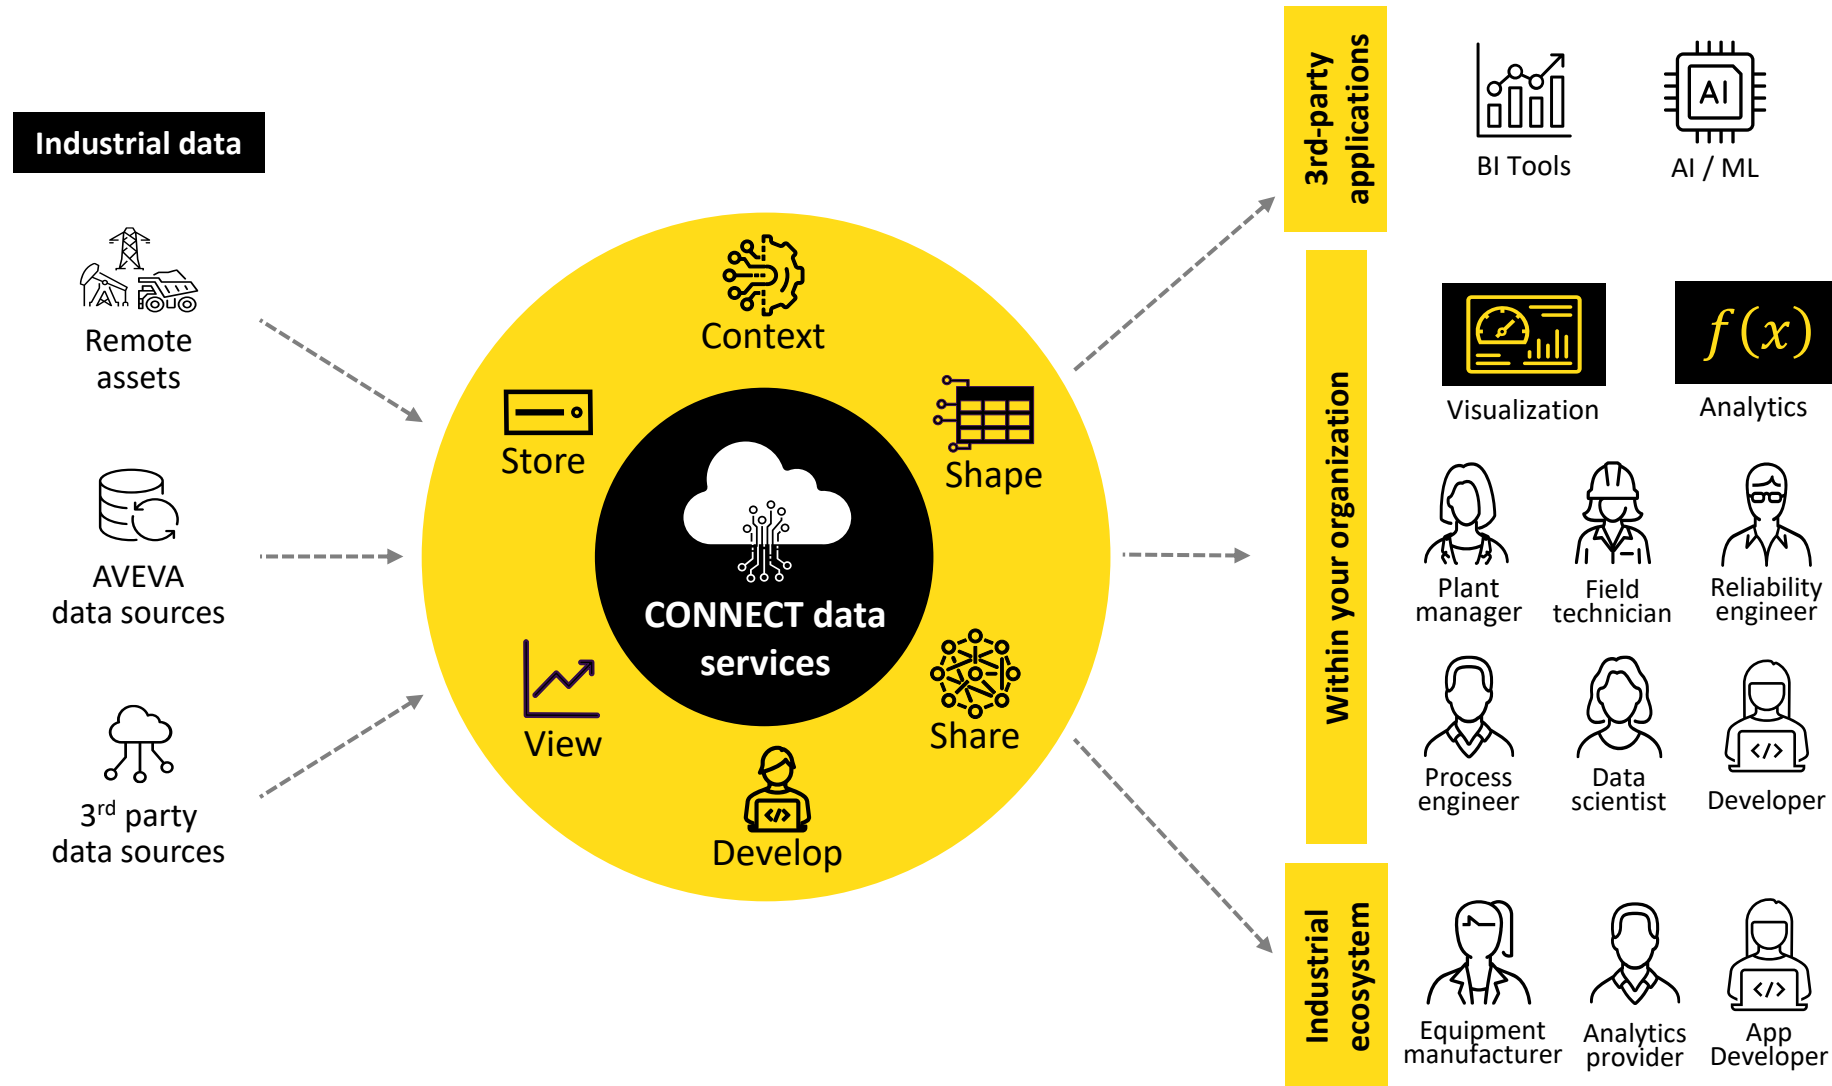

Edge Edition

Short Term Focus
(up to 1 Shift)
Work Cell View
Control Convergence

CONNECT data services (formerly AVEVA Data Hub)

Aggregate, contextualize, and share real-time industrial data

HMI/SCADA Use Cases

- Self-serve visualization
- Advanced analytics
- Configuration management
- Industrial AI Assistant
- Data sharing / consolidation via Data Bricks or MS Fabric

CONFIDENTIAL

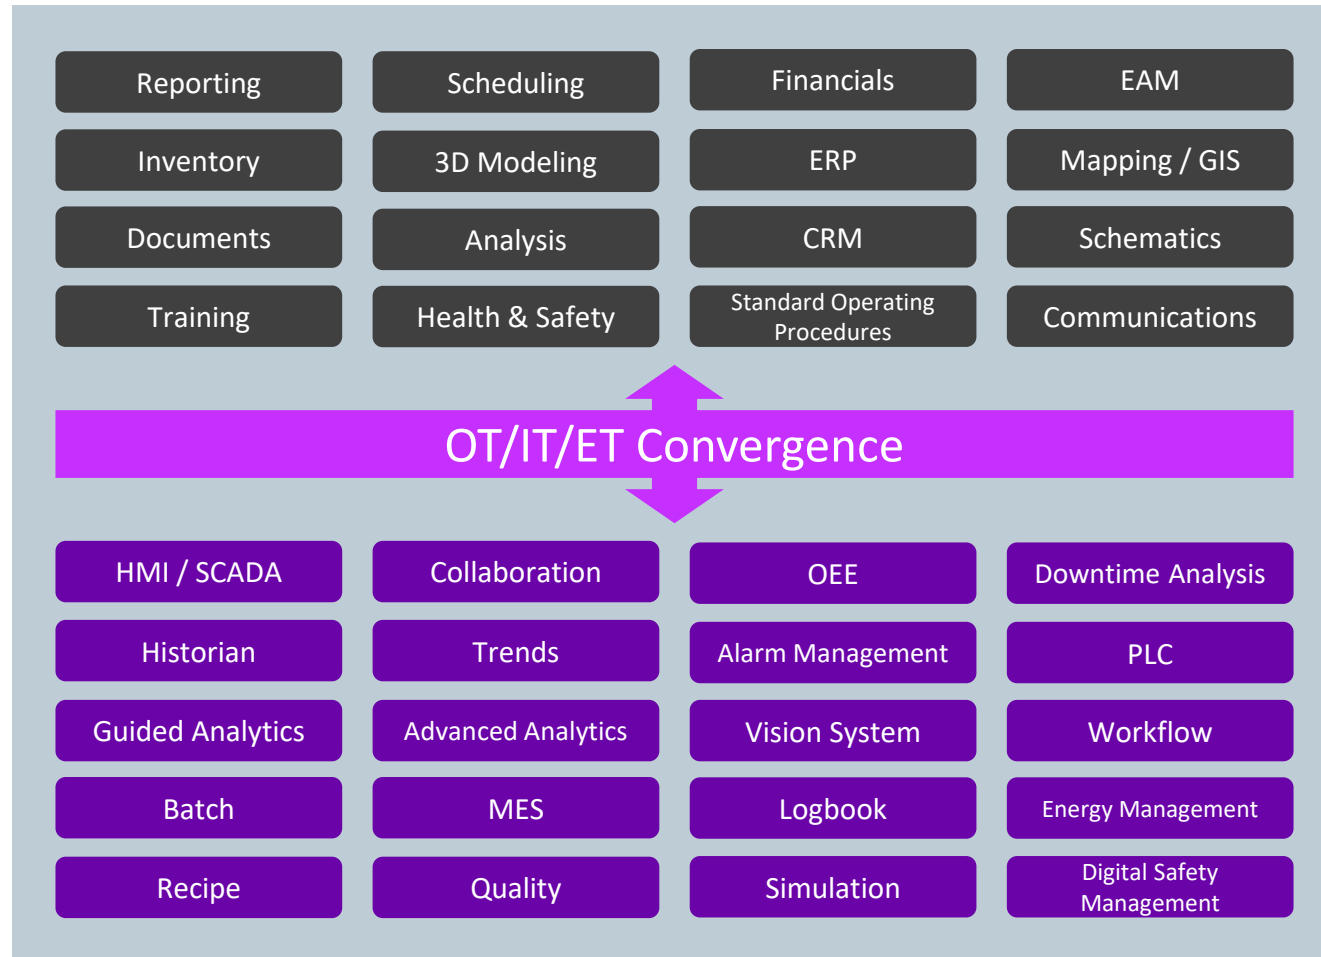

Expand Access

Facilitate the access to data and the applications to empower a remote and mobile workforce.

AVEVA

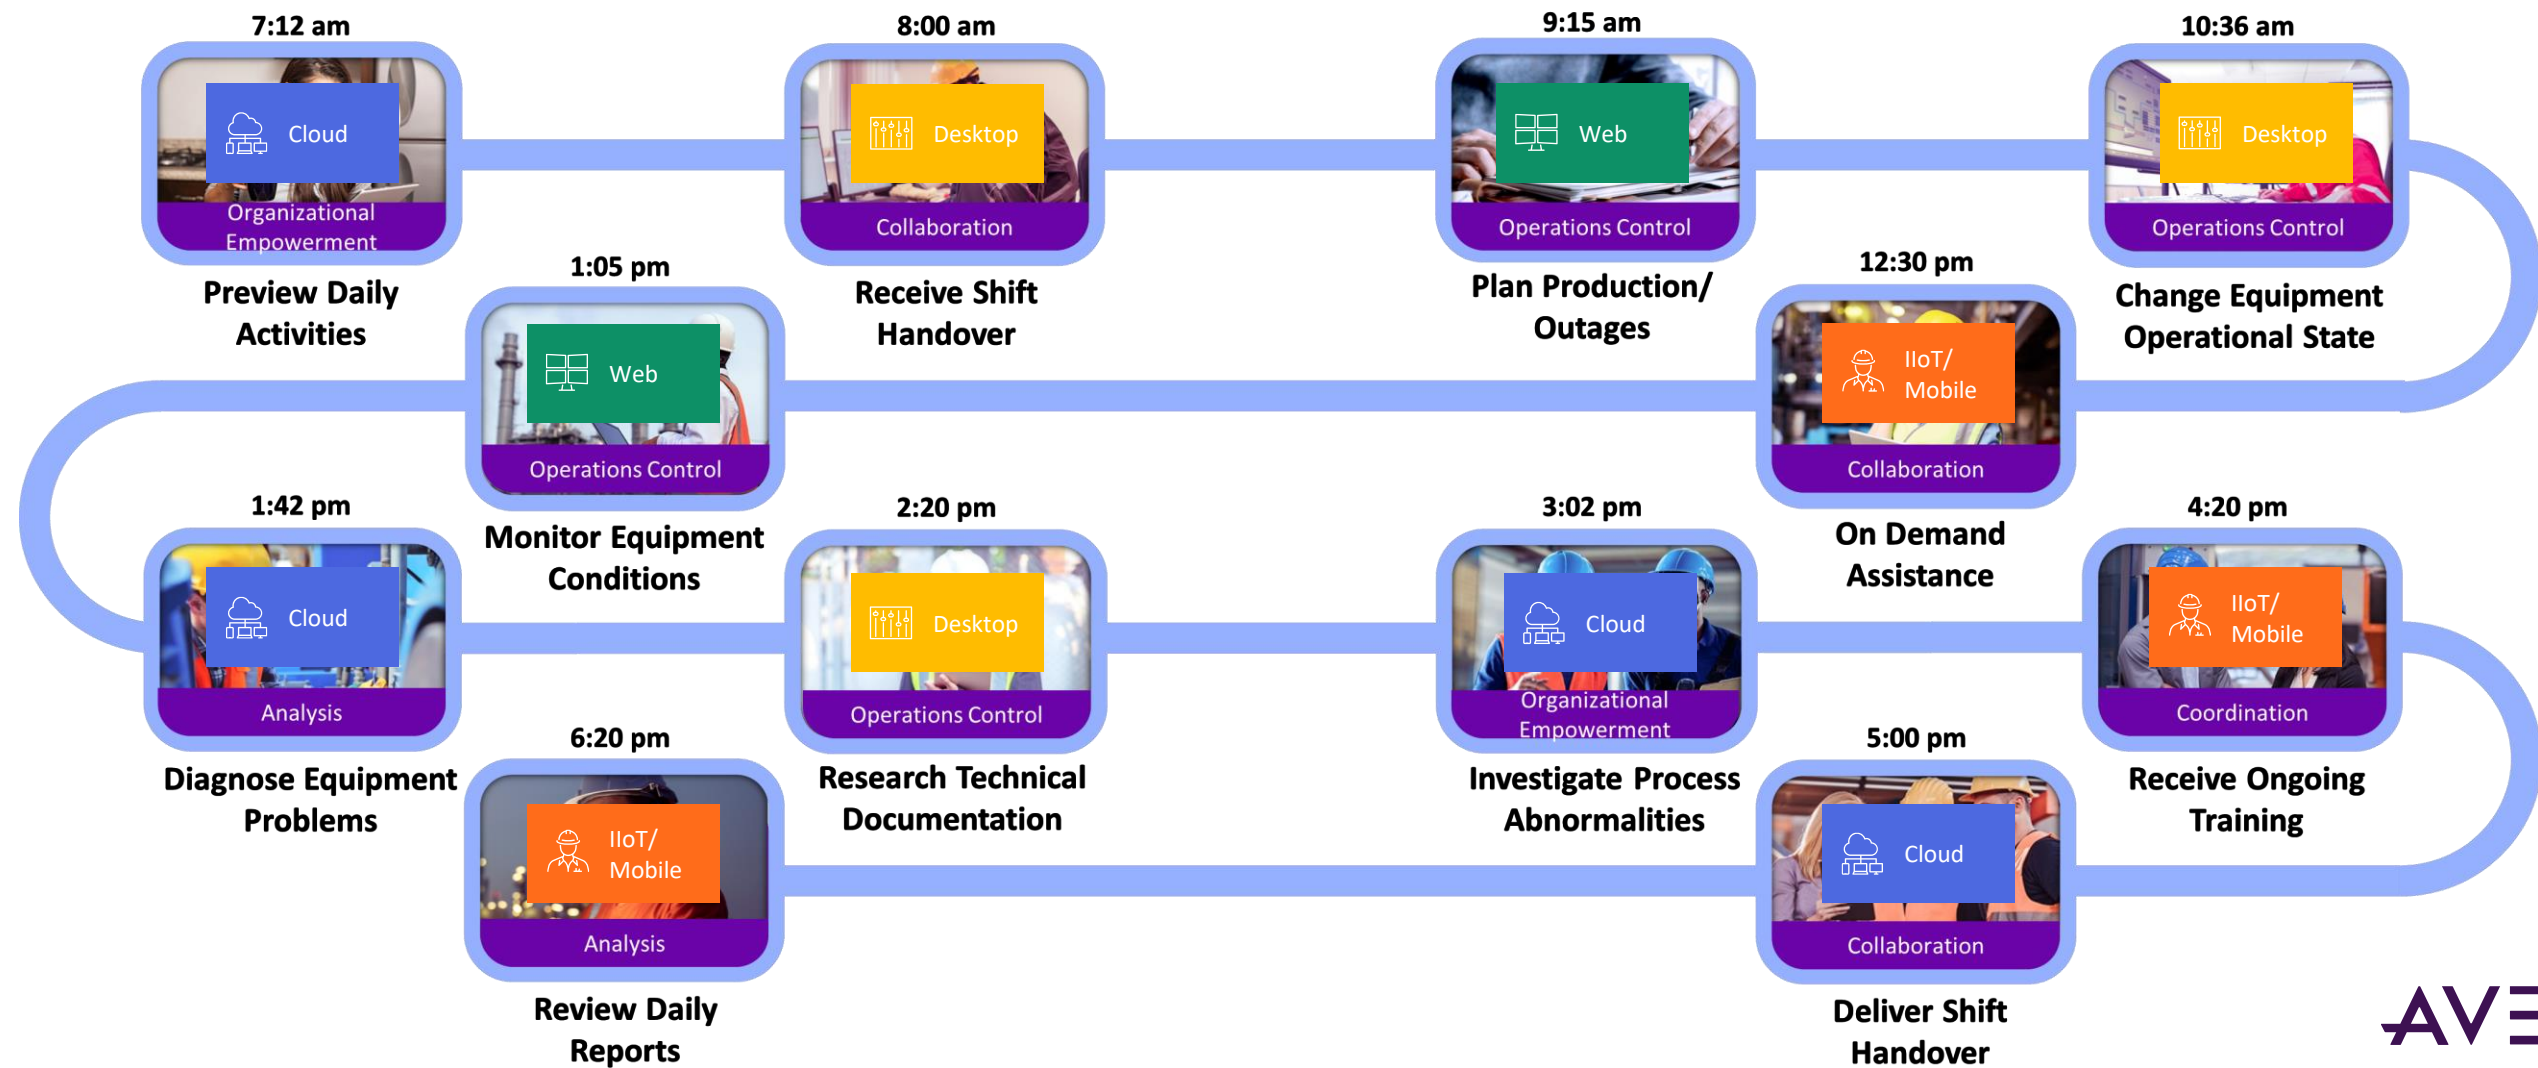

User Experience

Consolidating AVEVA and External Applications to a Single Unified Experience

Operations – A Day in the Life

Enabled By AVEVA Operations Control – Hybrid SaaS Solution

Common Visualization Technology

Consistent experience and management from Edge to Enterprise

AVEVA Operations Control Configuration Data

Human Machine Interface	Communications Drivers	Process Historian	Distributed SCADA	Industrial Reports	SaaS Data Management	Operations Management Interface	Enterprise Visualization	SaaS Collaboration
HMI	Drivers	Historian	SCADA	Reports	Insight	OMI	UOC	Teamwork
Windows	Devices	Trends	Objects/Assets	Static	Tags	Content	Assets	Assets
Symbols	Status	Alarms	Areas	Live	Assets	Apps	Areas	Workstations
Faceplates	Alias	Events	Platforms	Dashboard	Alarms	Widgets	KPIs	Issues
Alarms	Protocols	Query	Data Sources		Charts	Layouts	Apps	People
Trends		Retrieval Mode	Templates		OEE	Nav Model	Widgets	Training
Events		Excel Report	Alarms		Dashboard	Context	Data Sources	Forms
Asset/Data		Asset/Data	Standards		Standards	Asset/Data	Standards

Future Vision

Pivot from multiple independent experiences to a single unified experience

CONFIDENTIAL

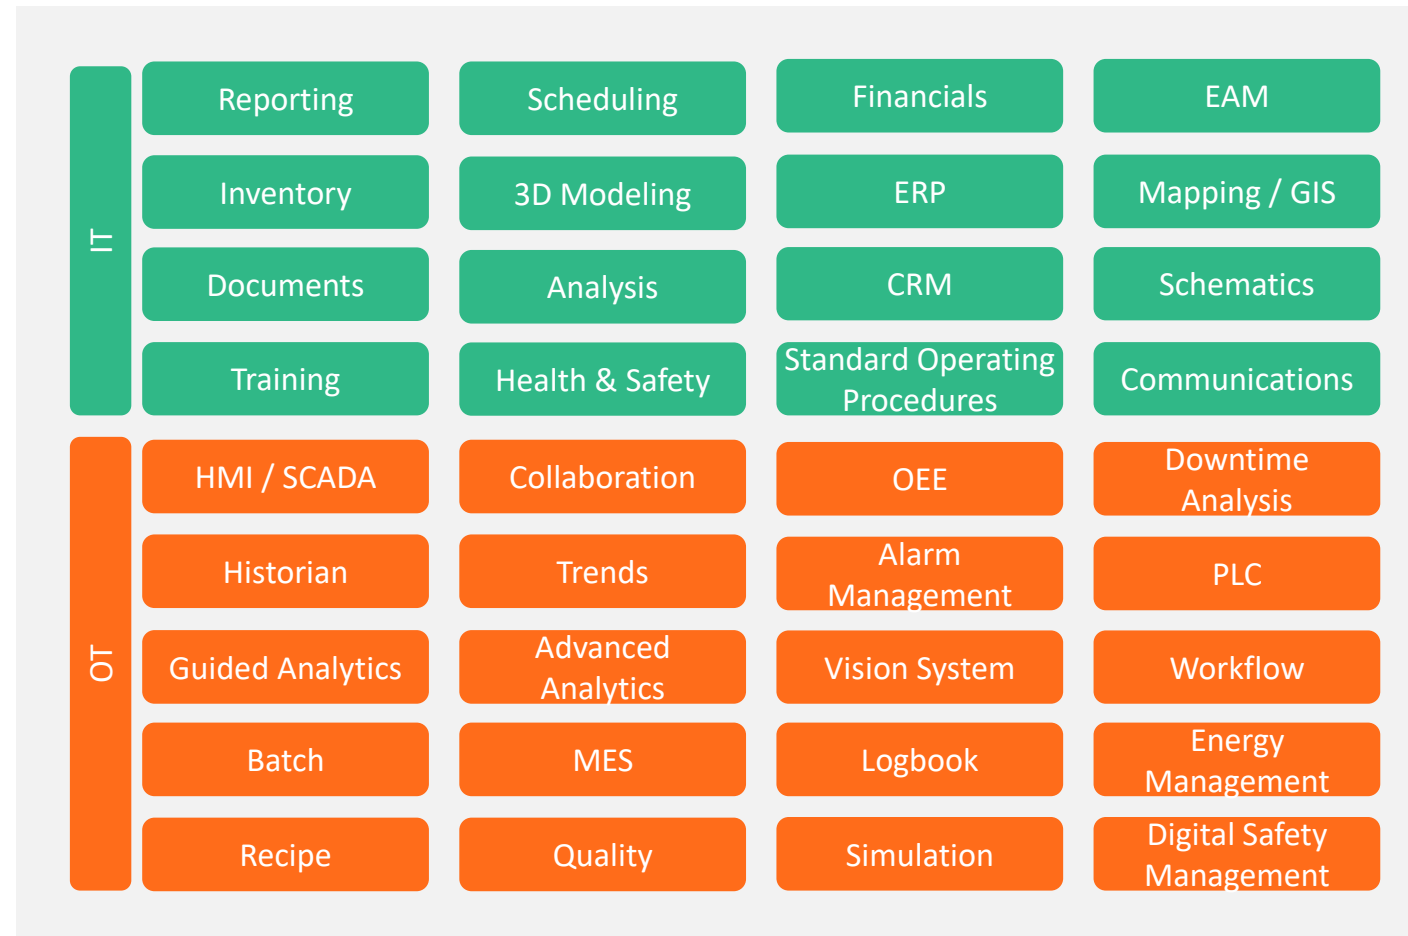

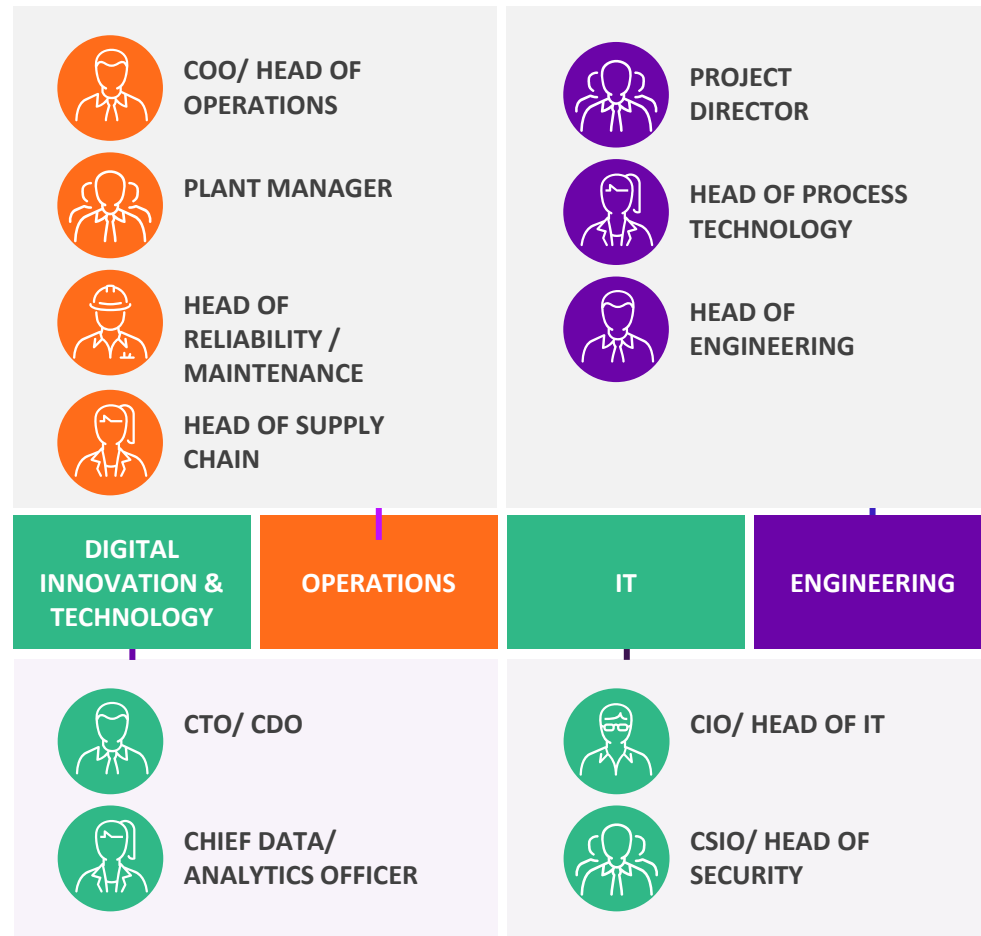

Expand Models

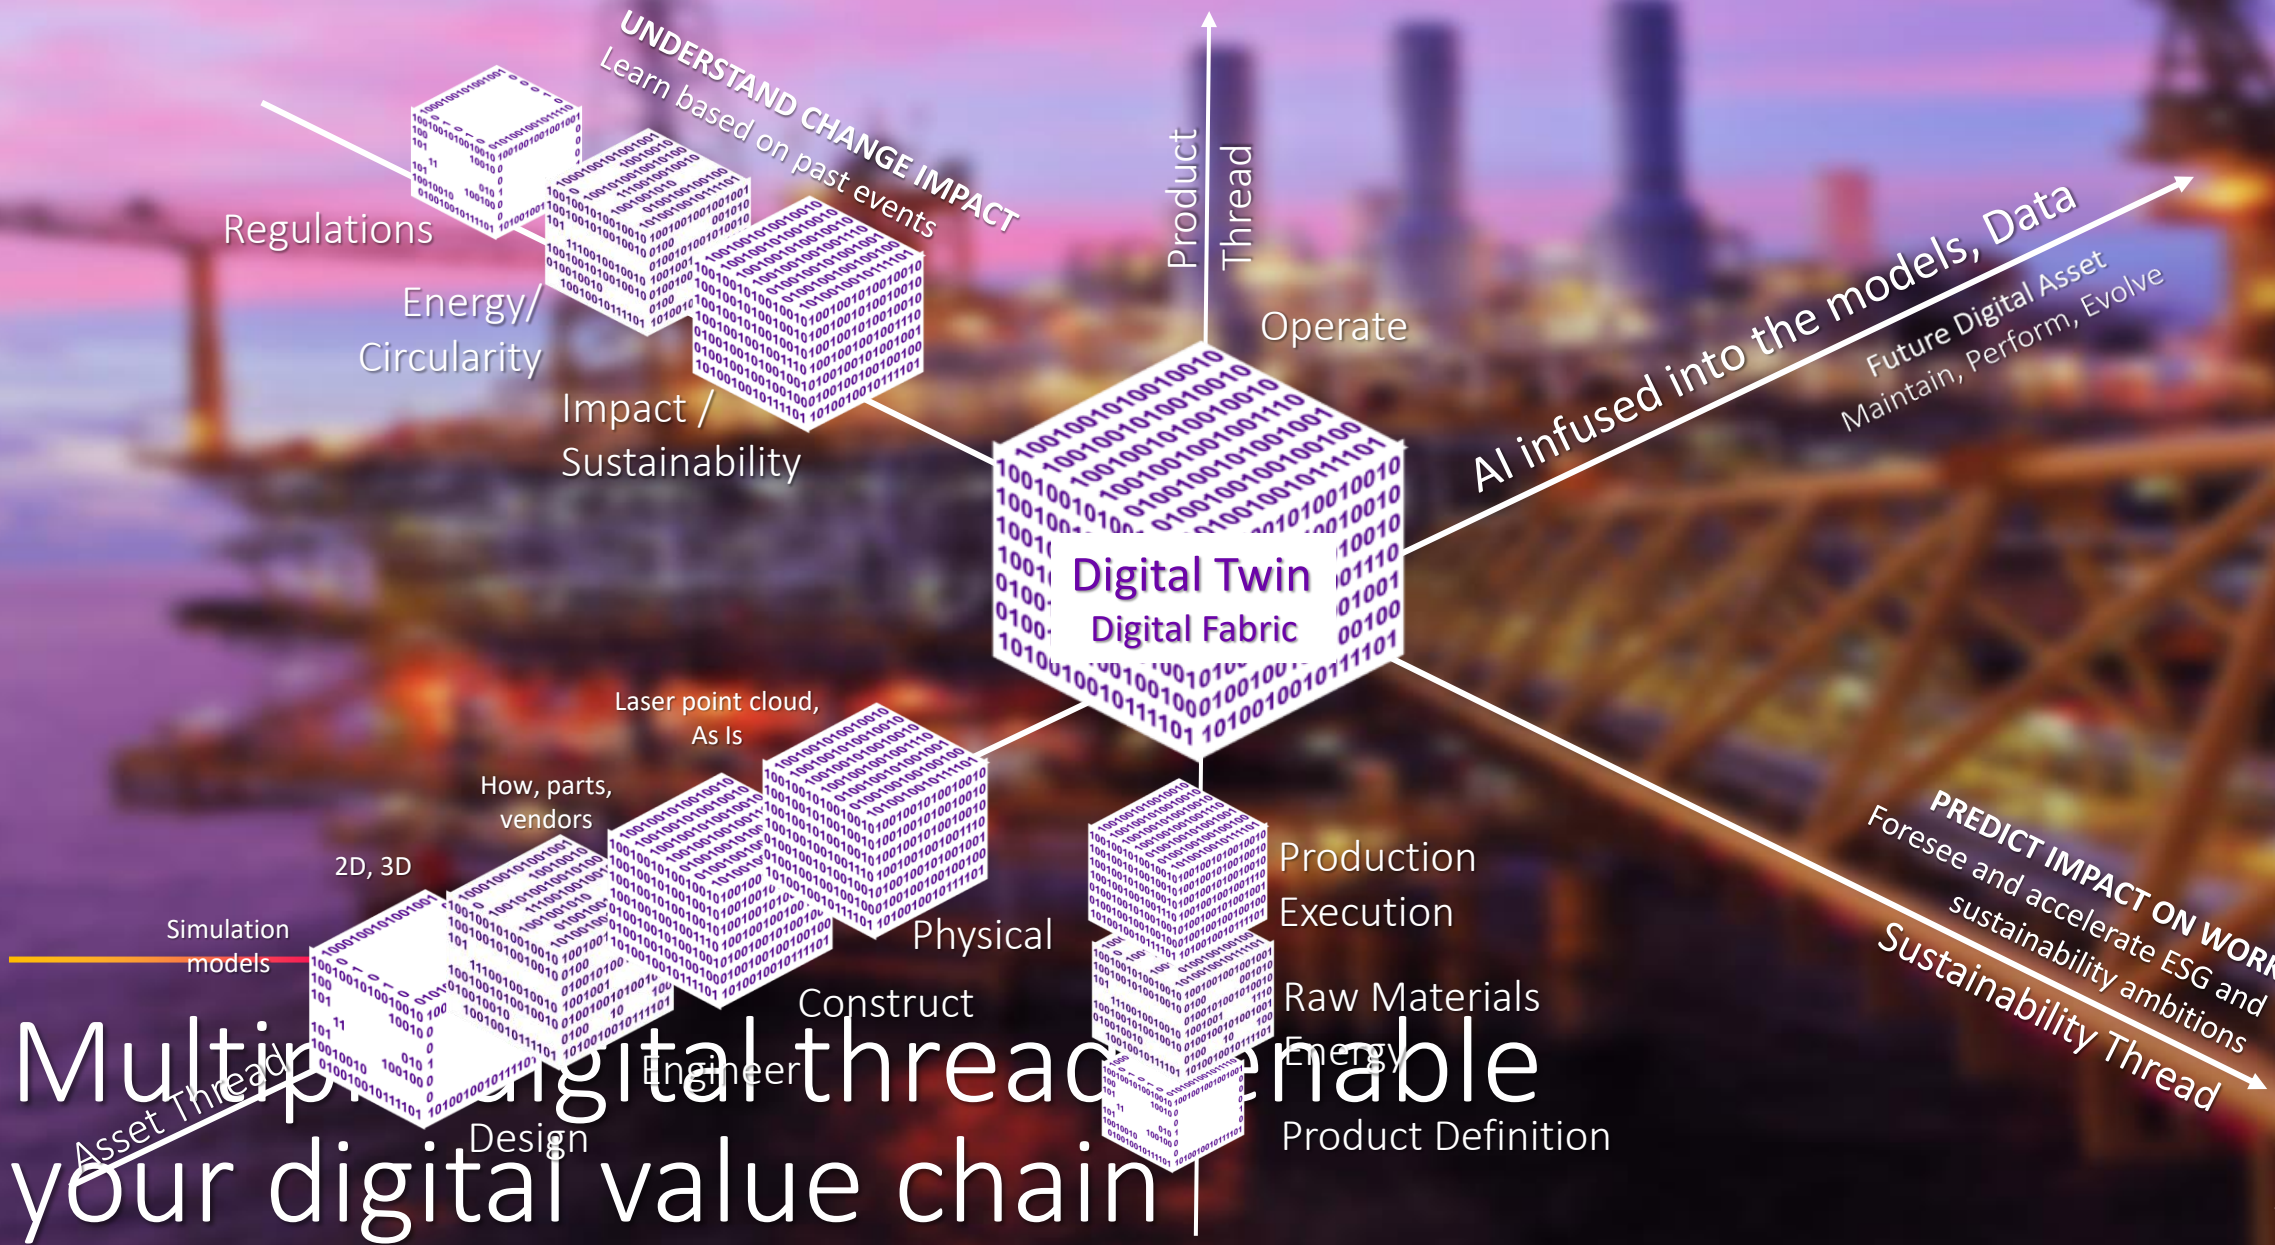

Drive down the cost of building and maintaining the systems used to manage industrial operations from edge to enterprise.

AVEVA

Increase Visibility to Siloed Systems/Groups

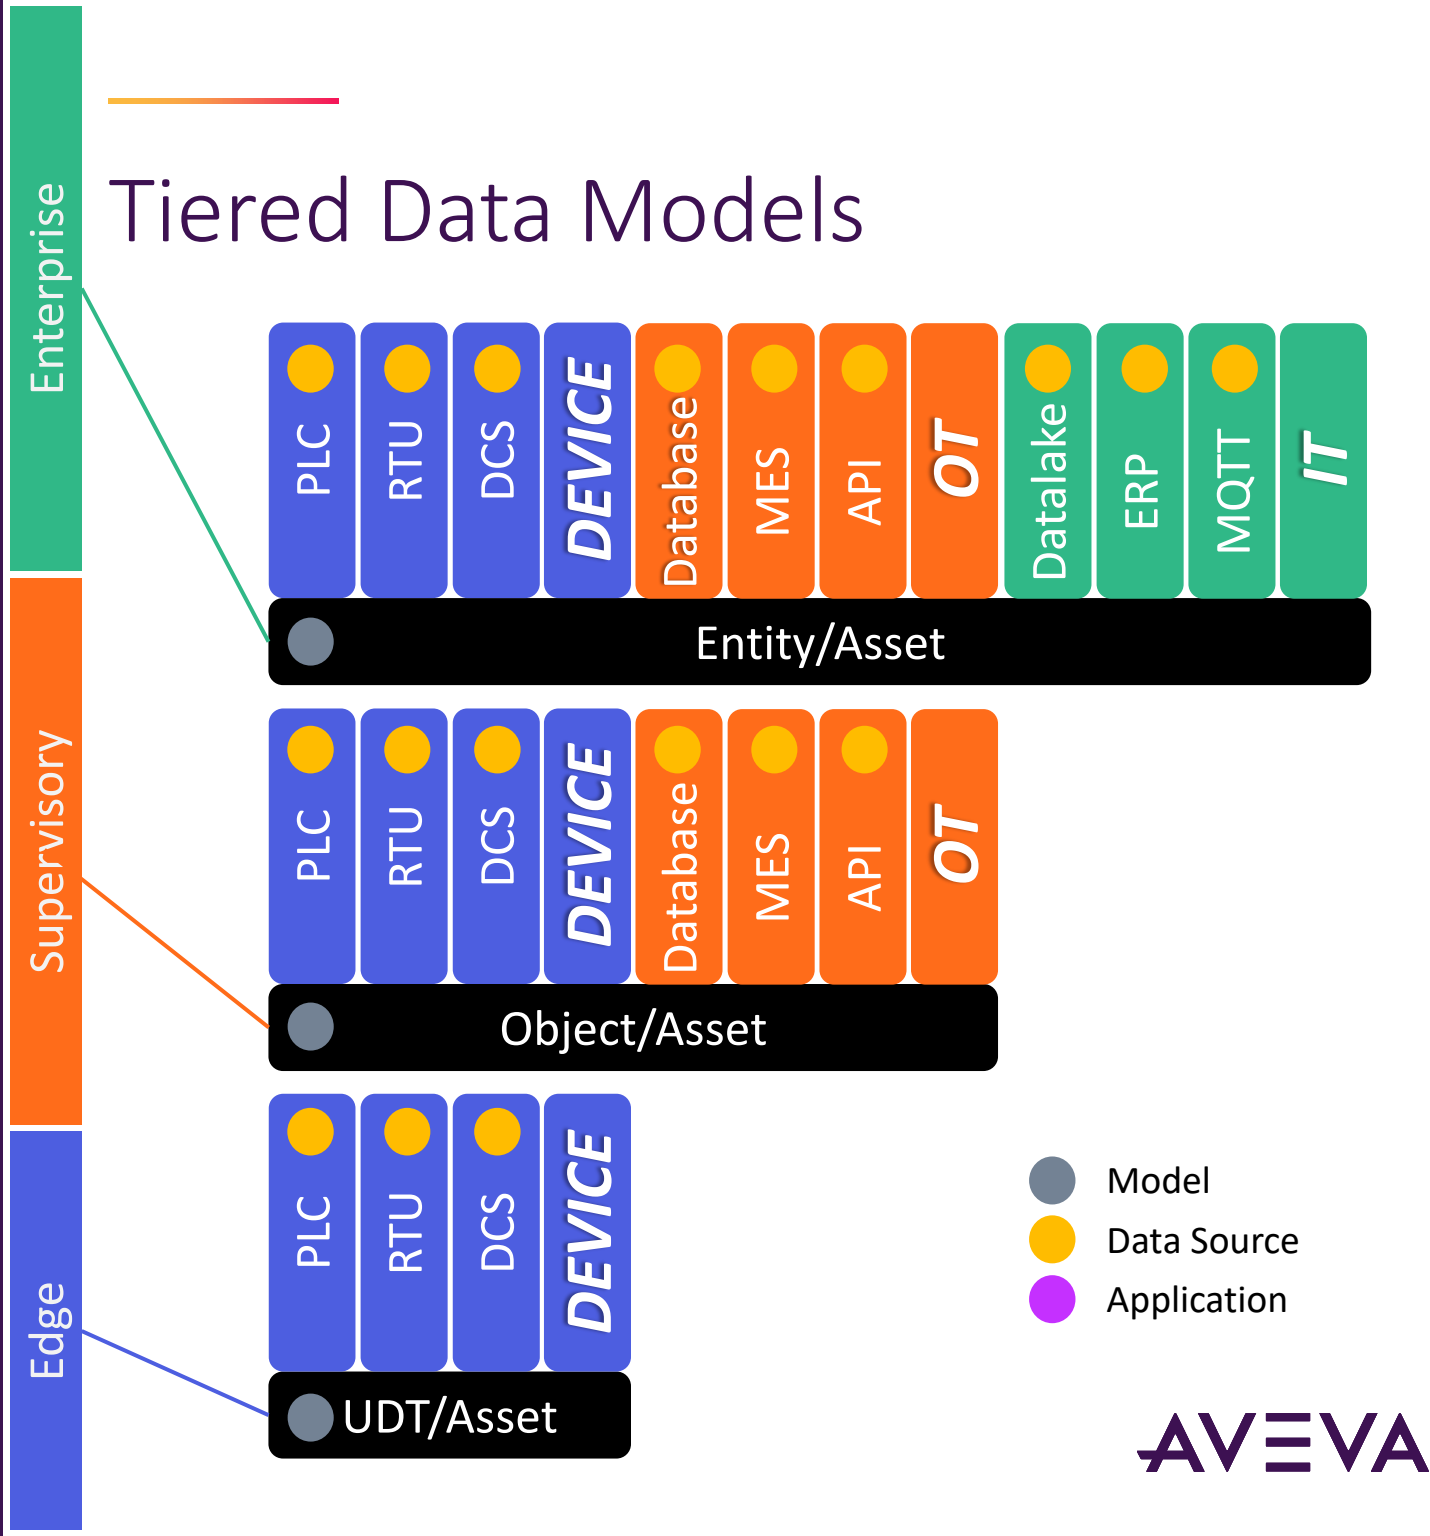

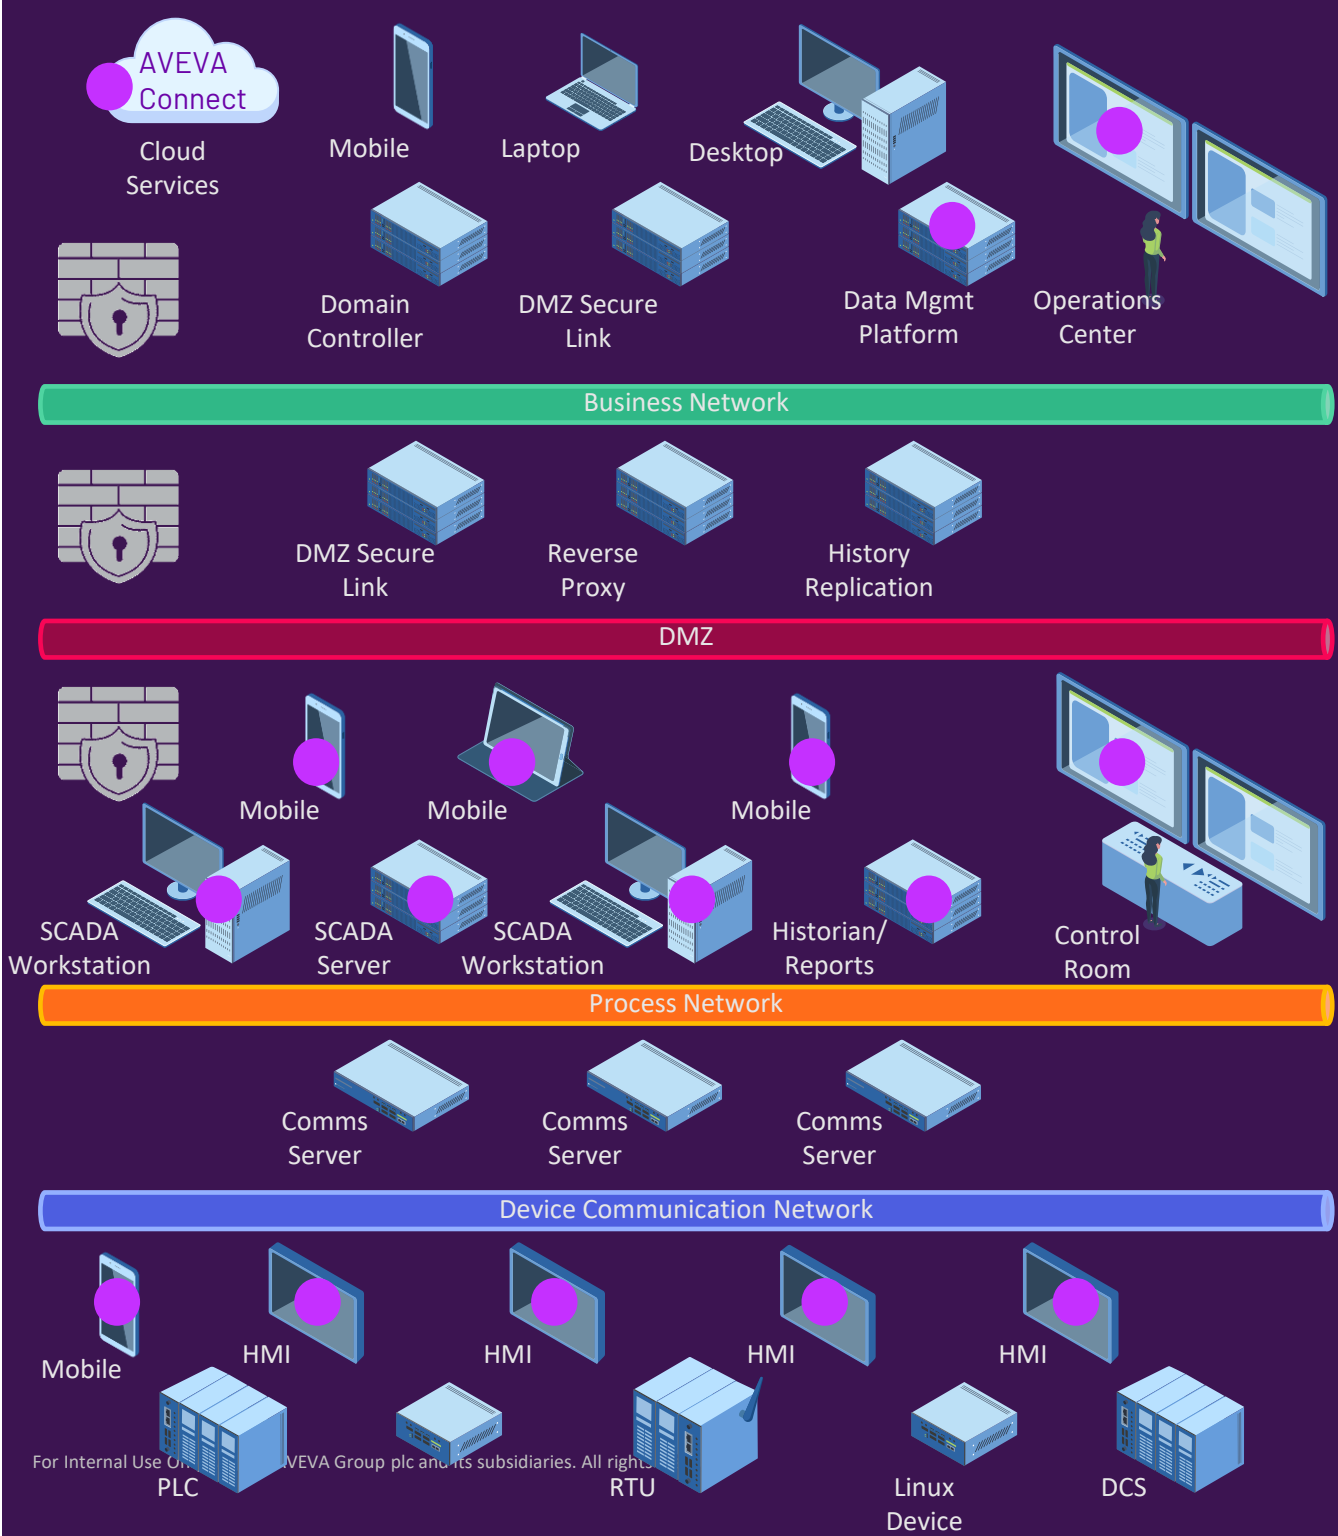

Independent Groups Established Systems to Meet Specific Goals (IT/OT/ET)

Multiple digital threads enable
your digital value chain

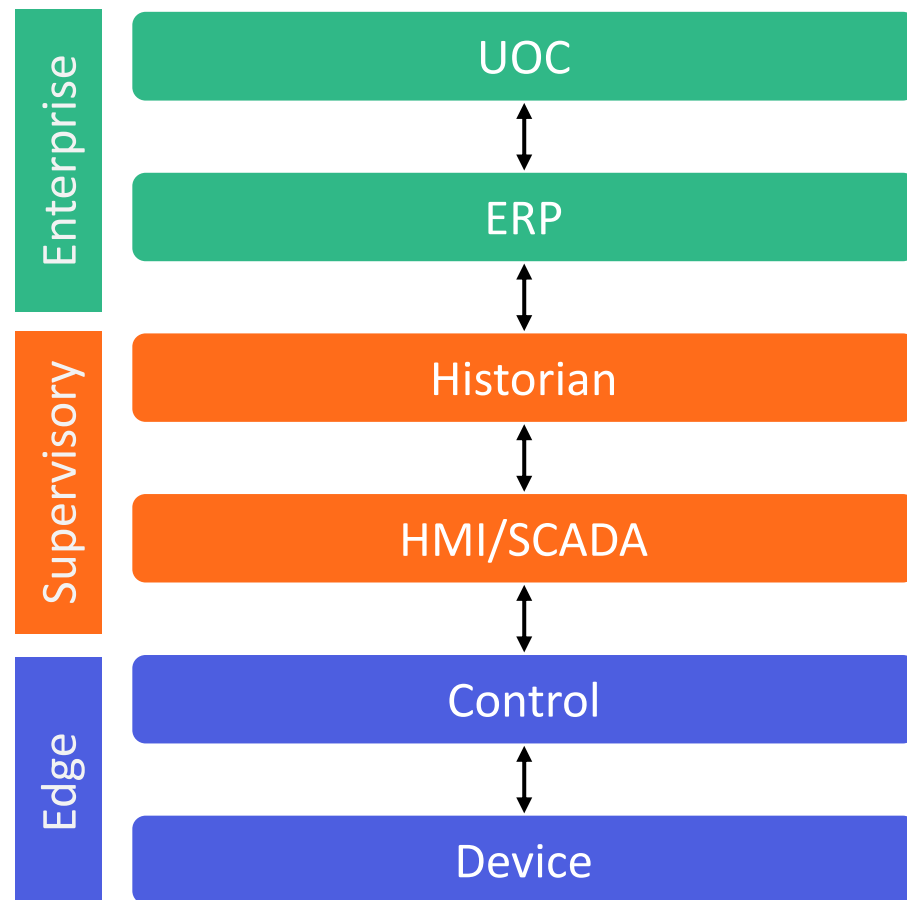

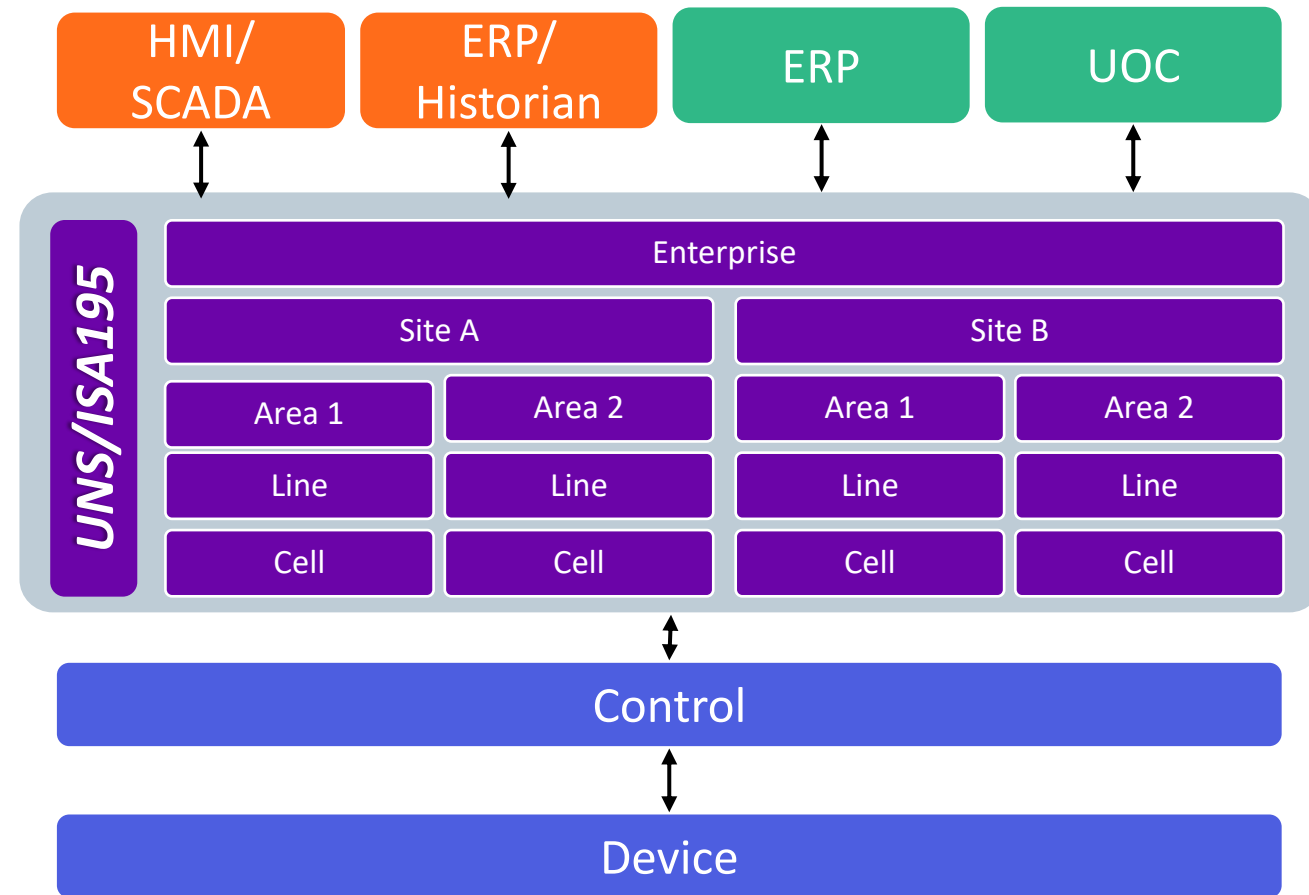

Purdue vs Unified Namespace (UNS)

Concept not Architecture

- Purdue Model

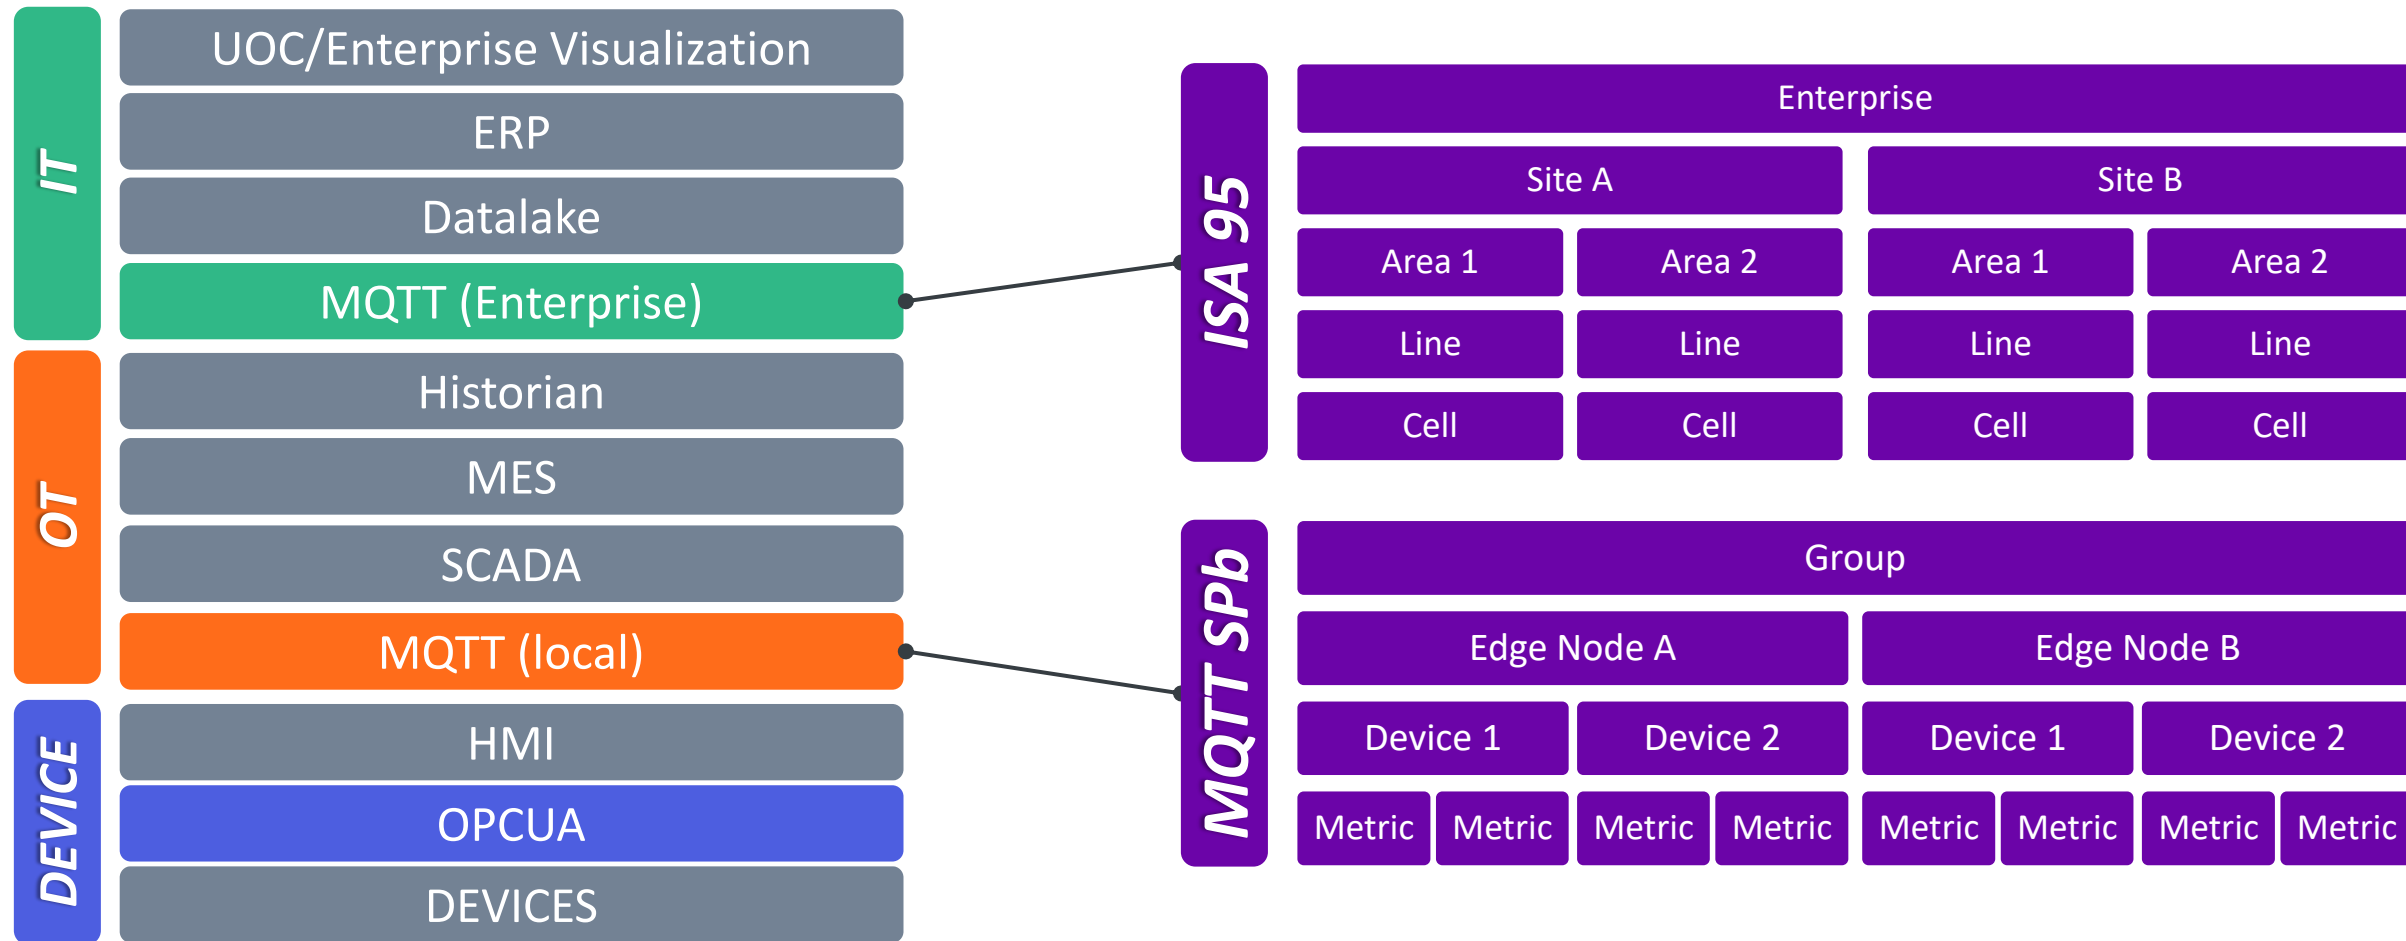

- UNS Model

Example: Unified Namespace (UNS) Across an Enterprise

MQTT Focus – Collapsing the Purdue Model

CONFIDENTIAL

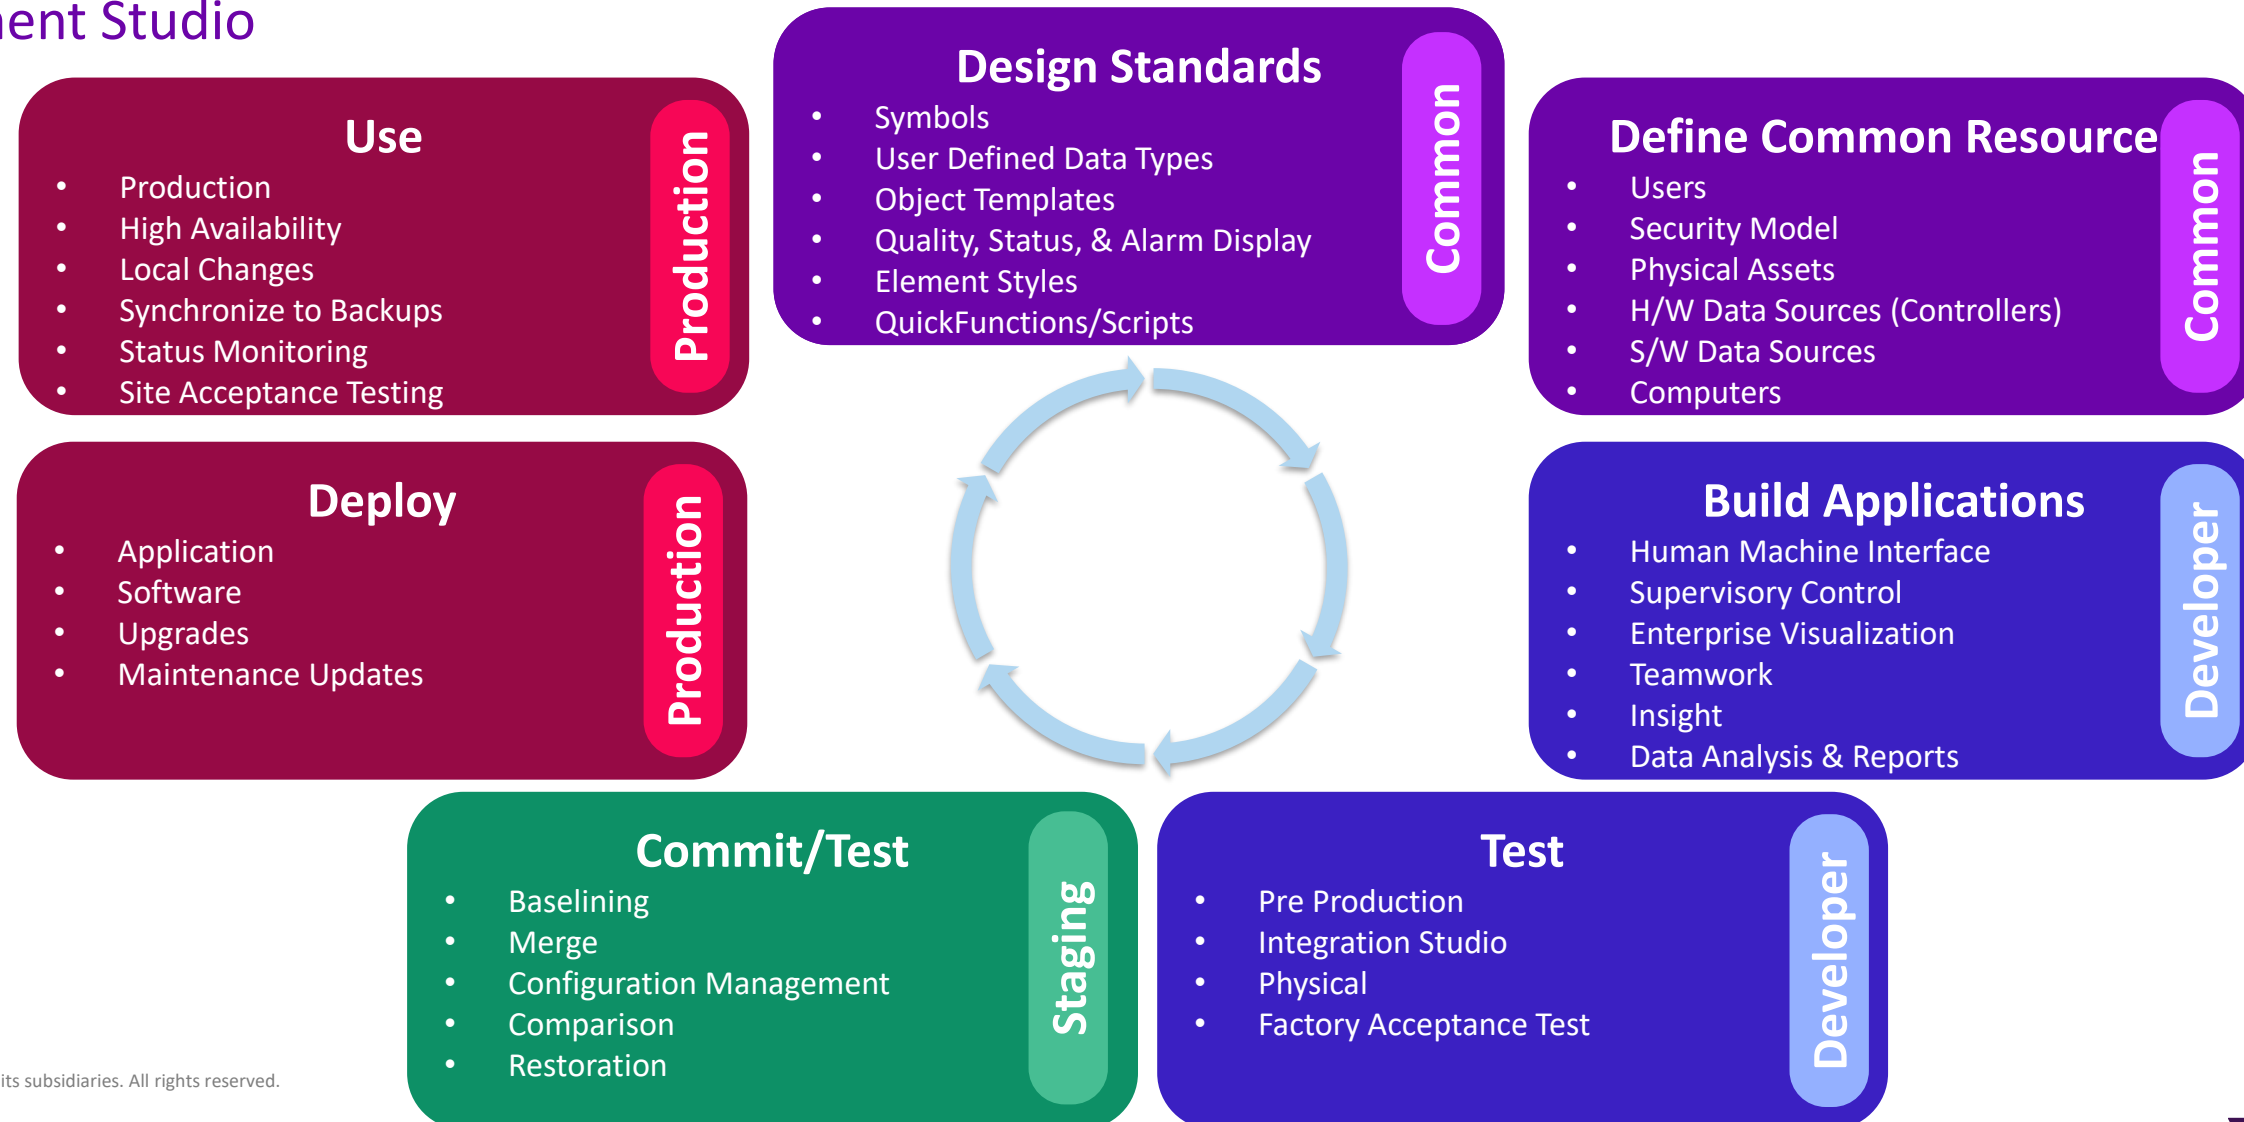

Improve Lifecycle Management

Challenge the traditional IT/OT boundaries and practices to drive the access to data across an organization.

Align Commercial Model

Challenge the traditional IT/OT boundaries and practices to drive the access to data across an organization.

AVEVA

Advancing Customers through the AVEVA Operations Portfolio

Customers begin with low technical and operational maturity

Pivot from product to portfolio

AVEVA Operations Control strategy

Visualization

- Industrial graphics
- Common visualization technology

Model

- Assets/definitions
- Templates
- Data structures (UDT)

Integration

- Open standards
- Communications
- Interoperability/security

Management

- Development Studio
- Integration Studio
- Edge Management

Collaboration

- Teamwork
- Users
- Issues/knowledge

Data/Analytics

- Data Hub
- PI System
- Historian/clients
- Reports
- CONNECT

Extensibility

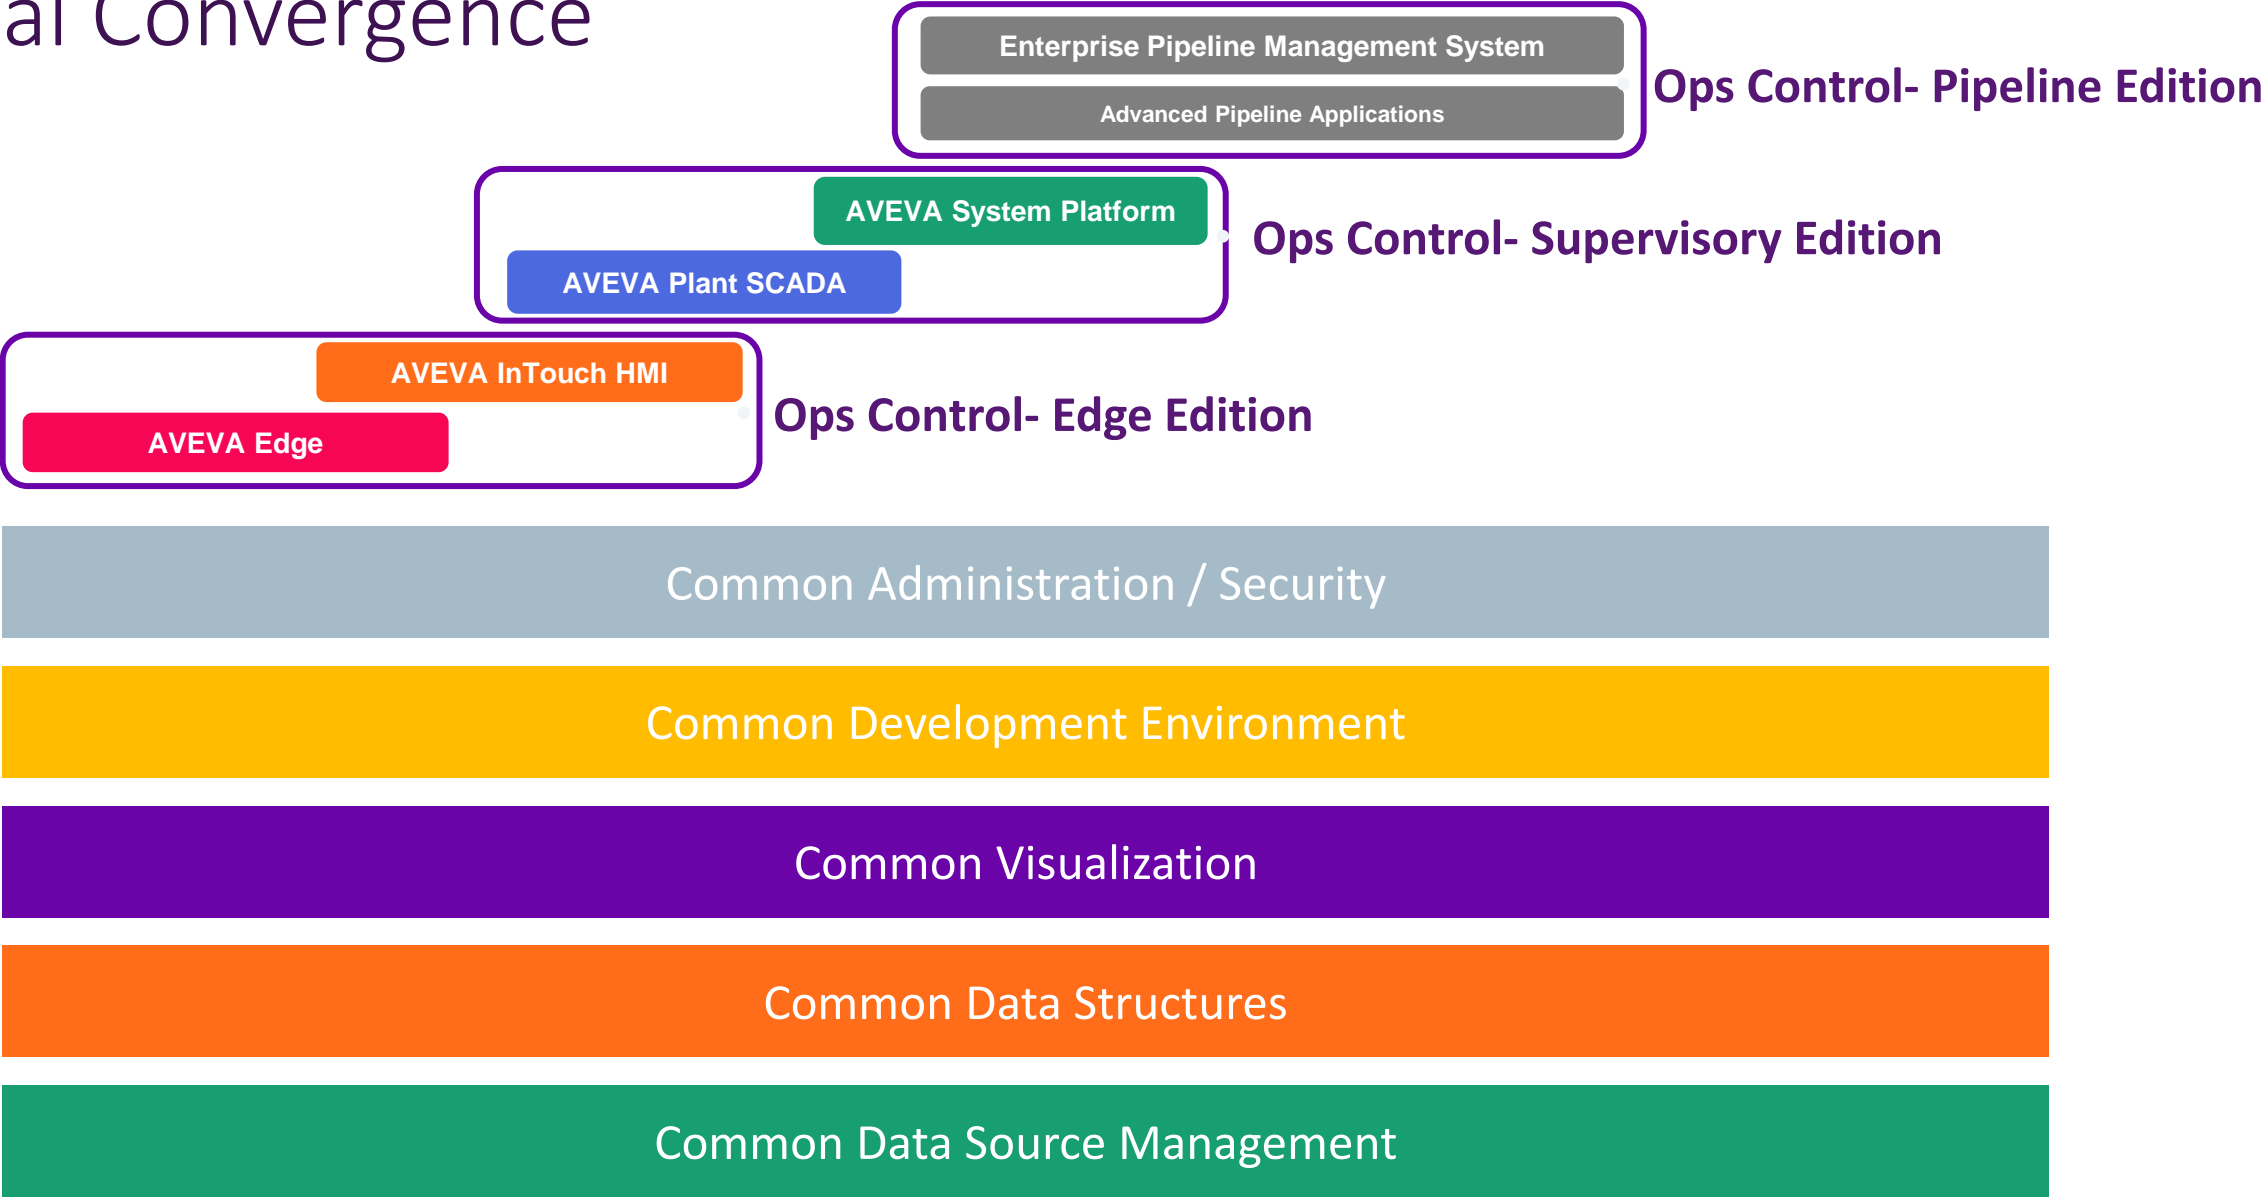

- Core technology
- Open scripting languages

Experience

- Entitlement access
- Licensing

Technical Convergence

ABOUT AVEVA

AVEVA is a world leader in industrial software, providing engineering and operational solutions across multiple industries, including oil and gas, chemical, pharmaceutical, power and utilities, marine, renewables, and food and beverage. Our agnostic and open architecture helps organizations design, build, operate, maintain and optimize the complete lifecycle of complex industrial assets, from production plants and offshore platforms to manufactured consumer goods.

Over 20,000 enterprises in over 100 countries rely on AVEVA to help them deliver life's essentials: safe and reliable energy, food, medicines, infrastructure and more. By connecting people with trusted information and AI-enriched insights, AVEVA enables teams to engineer efficiently and optimize operations, driving growth and sustainability.

Named as one of the world's most innovative companies, AVEVA supports customers with open solutions and the expertise of more than 6,400 employees, 5,000 partners and 5,700 certified developers. The company is headquartered in Cambridge, UK.
